

HELPFUL TIPS

GARDEN HOSE - PRE-FILTER

- Highly Recommended & makes initial balancing easier & future issues are greatly reduced.

SPA FILTERS

- Deep clean every 1-2 months using the FILTER-SOAK following directions on bottle. Rinse filters weekly or as needed.

OZONATORS

- Compatible with the all natural WATER TREATMENT & CONDITIONER.

CUP-HOLDERS

- Sweep these areas out as water will turn cool & may produce a slight odor.

BATHING SUITS

- Wash in hot water with no soap & double rinse to remove dyes & any soap residues.

NECK JETS

- All jets including neck jets, waterfalls, etc.. should remain open slightly so water may flow freely during filtration cycle.

SPA COVERS

- Spa covers and headrests should be cleaned if any odors are present.

*If you have drained your spa and expect to leave it drained for an extended period of time, you may want to 'shock' the water with chlorine when you refill.

WHY?

Bacteria, water mold, and algae can grow in your spa lines during shut down, and this 'shocking' should eliminate any contamination. ½-oz for spas up to 250 gallons / 1-oz for spas up to 500 gallons.

SPA RECOMMENDATIONS *Before testing your water always run pumps on high for at least 2 minutes for accuracy.

WATER TEMPERATURE RANGE - 90° or higher

PH LEVEL – 7.6 - 8.2 ~ ALKALINITY – 80 – 120

- Our WATER TREATMENT & CONDITIONER helps stabilize at these levels.
- See the Hamilton Index™ for more information on proper hot tub water balance.

TOTAL HARDNESS – 200 – 400PPM

- If hard water, use a stain & scale control or metal out product.
- If low calcium hardness (under 200), use a calcium increaser.

FILTRATION SYSTEM

Minimum (6-8) hrs per day. 24-7 filtration is recommended if capable.

If your source water is hard water and you have not used a pre-filter, then the recommended amount of a Stain & Scale control should be used weekly. Follow Directions on bottle. Also a Metal Out may be used when filling spa.

These chemical guidelines are to help maintain proper water chemistry in your spa. Please keep in mind that all spa water is different based upon water source and frequency of use. If you are not using a pre-filter have your water tested by your local dealer to determine what, if any, additional chemicals are needed. For residential use only. Use as directed. The purchaser assumes all liability and responsibility while using this product. Do not take internally. Keep out of reach of children. Use in conjunction with an EPA registered chlorine. Spa Chlorine Granules (99% Sodium Dichlor) is highly recommended.
